	May 7, 2008	Draft Revision	

The Board directs the development and approval of a Safety and Emergency Plan designed to assure every student a safe learning environment. This plan will comply with federal, state and local laws and regulations and with Board policy.

Local building safety committee will be appointed by the school administrator and will ensure that general safety regulations are reviewed with staff and students as appropriate in order to assure student safety.

Instruction will assist students to:

- Learn how to work, play and exercise safely and how to prevent accidents;
- Learn proper procedures to reduce the possibility of accidents;
- Develop habits of good housekeeping, proper storage and handling of materials;
- Develop skills in the safe use of tools and equipment;
- Respond to emergency situations in all settings.

Safety instructions will precede the use of materials and equipment by students in applicable units of work in the courses listed above. Instructors will teach and enforce all safety rules set up for the particular courses. These will include but not be limited to wearing protective eye devices in appropriate activities.

Instructors will be required to document in lesson plans the completion of safety instruction. Instructors will be required to document in lesson plans the names of the students in attendance for the safety instruction.
